-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 22 – 26, 28 - 39 are rejected under 35 U.S.C. 102(b) as being anticipated by Goddard (U.S. 4,297,629)

Regarding claim 1, Goddard discloses wherein a method for supplying power to at least one load during failure of a main voltage source, wherein batteries serve as an emergency voltage source supply to the at least one load during failure of the main voltage source and are connected to the main voltage source, the method comprising:

splitting the batteries into at least two battery groups, with the batteries of each group being connected in series (figure 1 items BT1 and BT2 column 4 lines 25 – 44);

connecting each of the battery groups in parallel to the main voltage source for charging (column 4 line 61 – column 5 line 4), and

connecting the battery groups in series to the load for use as the emergency voltage source wherein splitting the battery groups and connecting the battery groups in parallel to the main voltage source comprises doing so using a single switching device (column 6 lines 29 – 37),

wherein splitting the battery groups and connecting the battery groups in parallel to the main voltage comprises doing so using a single switching device (figure 5 item RL; column 2 lines 49 - 53).

Response to Arguments

3. Applicant's arguments filed 11/12/08 have been fully considered but they are not persuasive. **Regarding claims 1, 22 - 26, 28 – 39**, the applicant argues that the Goddard reference does not disclose or suggest using a single switching device. Goddard discloses in columns 2 line 66 - column 3 line 2 wherein a relay is provided to simultaneously switch the batteries from series to parallel connections.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
